**Slowly but surely have our Oxford** mixtures worked their way to the front. Your next suit should be one of them. Tailored in our own exclusive way. j618-2W

**RUDOLPH & WALLACE,** 333 Main street. j618-2W

## REMOVED TO BALTIMORE

**The Post Office Robbers Taken** There for Trial.

**THEIR PICTURES TAKEN**

**Chief of Police Kizer, Accompanied** by Post Office Inspector Maxwell.

**Who Identified the Suspects, Took** Them to the Monumental City Last Night—Resisted Efforts to Take Their Pictures.

**Frank Morris and Charles Williams,** the men arrested here yesterday for robbing the Princess Anne, Md., post-office of \$470 worth of stamps, were carried to Baltimore yesterday afternoon on the Bay Line steamer.

**Postoffice Inspector Maxwell** arrived here yesterday morning and identified the men from the description given him by Princess Anne people who saw them at that town. Inspector Maxwell went to Princess Anne from Washington Friday morning, the robbery having occurred Thursday night, and he sent the description of the supposed robbers to Chief Kizer Friday afternoon, which resulted in the arrest of the men, an account of which the Virginian-Pilot published yesterday.

**IN BALTIMORE JAIL.**

**Chief Kizer and Inspector Maxwell** took the prisoners to Baltimore, where they will be lodged in jail to await trial. The inspector has not the least doubt but that the men under arrest are the robbers of the Princess Anne.

**PHOTOGRAPHED.**

**Pursuing a policy which he adopted** when he went into office, Chief Kizer yesterday morning had a photographer to make photographs of the prisoners. Contrary to most people when sitting for their photographs, the men didn't want to "look putty" at all. They made very faces, twisted, contorted their facial muscles, stuck out their tongues and did everything they could, in fact, to look like someone other than themselves. Both of them had to be held while the photographer got his focus on them, and even then he had to pick his chance to take the snap shot.

**SYSTEM OF MEASUREMENT.**

**If the Bertillon system for the mea-**surement of criminals was in use here, the men would have been subjected to this, which might have been the means of identifying them in other cities. This system is so complete that it is almost impossible for a man to be mistaken for another. Chief Kizer has recommended that it be adopted here. It would cost the city, he says, only \$125.

**WILL GET REWARD.**

**It is said that the Government** pays a reward of \$200 for every postoffice robber captured by other than postoffice or government officers. Detectives have been looking for the robbers of the Princess Anne for some time, and this is the rule and practice.

**WASHINGTON AND LEE.**

**NORFOLK SOCIETY PEOPLE AT-**tend the FINAL BALL.

**The crowning social event, the final** ball of the Washington and Lee University at Lexington, took place Wednesday, and was largely attended by society people from all over the country. The ball was opened by Final-Ball-President Stewart L. Crebs, of Charming, Ill., and Miss Bettie Wilson, daughter of President William L. Wilson, of the university. With this couple were fifteen other couples all of whom were the wives of the men in the rear and executed a beautiful opening figure with graceful movements. An elegant supper was served at 1:30 a. m. in the Warren-Newcomb Hall.

**Among the couples in the opening** figure were:

**Mrs. Tazewell Hubbard, of Norfolk,** Va., yellow cordials, diamonds and Kappa Alpha Order, with Mr. Tazewell T. Hubbard, of Norfolk, Va.

**Miss Evelyn Lewis, of Tallahassee,** Fla., crepe de chine, point lace and diamonds, with Mr. A. C. Freeman, of Norfolk, Va.

**Miss Mary Cannon, of Norfolk, Va.,** lace and diamonds, with Cadet A. D. P. Janney, of Leesburg, Va.

**THE NANTUCKET HERE.**

**NEW MERCHANTS' AND MINERS'** LINER COMES HERE FOR CARGO.

**The Merchants' and Miners' Trans-**portation Company's new steamer, Nantucket, just completed by Harlan & Hollingsworth, of Wilmington, Del., arrived here from Baltimore yesterday morning and left late in the afternoon for Proctor street, R. L., with a large cargo of truck, etc.

**The Nantucket is commanded** by Captain John March, late of the steamer Junata. The new steamer is almost an exact duplicate of the Kerehaw, recently completed for the Merchants' and Miners' Line.

**There were aboard the Nantucket** when she arrived yesterday morning Mr. N. W. James, one of the directors of the Merchants' and Miners' Transportation Company, and Messrs. Charles James, Frank Redwood, Alex. Harvey and Augustus Lehman.

**Lamp Explosion.**

**The fire department was called** about 8 o'clock last night to respond to an alarm from box 51. This proved to have been caused by a lamp explosion at No. 93 Queen street, occupied by a colored man named Charles Bronskill. The fire was extinguished by neighbors before the arrival of the fire department. The loss was slight.

## EARLY CLOSING. SATISFACTORY RESULT OF THE EFFORTS OF RETAIL CLERKS' ASSOCIATION.

**From time to time the Virginian-Pilot** has noted the progress of the efforts of the Retail Clerks' Association to induce local retail dealers to close their stores at such an hour as would allow the clerks employed in them more leisure time.

**Under the conditions existing** for many years a large number of Norfolk's store clerks have rarely had an evening off excepting Sunday evening, but have labored early and late. Many of them began the day's work at 6 or 7 o'clock a. m. and worked hard until 9 to 11:30 p. m., with a short time off for dinner and supper.

**Norfolk Retail Clerks' Union No. 25** was organized in June, 1893, and has ever since its organization endeavored to secure an earlier and a uniform closing of the retail stores of the city. In this it is now, with the cooperation of the other labor unions of Norfolk, to a large degree successful, for on Monday next (June 19th) the stores on Main street, most of those on Church street and a large percentage of those on Bank and Granby streets will close at 7 p. m., under agreement with the association. This is exclusively of Saturday nights and the month of December. These reasonable exceptions are customary elsewhere and will readily be seen to be for the accommodation of the public, as many people are paid off by their employers on Saturday night and then do a large part of their buying for the ensuing week, and December is the shopping month before the Christmas and New Year's holidays.

**For some time many of the better** stores of the city have been closing at 7 p. m., but the movement begins tomorrow as a general practice, and buyers should take note of it. The new arrangement will affect about 300 to 400 clerks.

**Norfolk's Retail Clerks' Union** now has about 1,000 members and a number of new members will be received at its next meeting on the night of the second Monday in July. The union meets on the second Monday of each month at Engel's Hall, on Main street.

**NEW BUSINESS BLOCK**

**First Fruit of Sale of C. & O.'s** Granby Street Property.

**A Handsome, Modern Four Story** Business Block to Be Erected—Tenants Ideas to Be Carried Out.

**Several days ago the Virginian-Pilot** noted the sale of the valuable Granby street property of the Chesapeake and Ohio railway to local capitalists, and the subsequent re-sale of a portion of it to various local purchasers whose object was to secure sites for new business structures.

**The sale is already bearing fruit** that will soon cover this property with some of the most desirable and eligibly located stores and offices in the city.

**Mrs. Anna R. Taylor and Miss Tay-**lor will build a handsome four-story brick building on Granby street, at the corner of Brooke avenue, on land recently purchased by them of the Chesapeake and Ohio railway (a part of the old Tazewell homestead).

**Mr. J. E. R. Carpenter, the well-**known architect, who has many fine monuments to his skill in important buildings in this city, has been engaged to prepare plans for the building and superintend its construction.

**The plans will be drawn at once** in conformity with the requirements of the tenants, and when finished the building will be pushed to an early completion.

**This is the starter, but it is stated,** other purchasers of the choice Granby street frontage will also soon take steps to cover their sites with thoroughly modern business blocks that will make liberal returns on the capital invested.

**HE GOT HIS MAN.**

**DEPUTY MARSHAL BENDIT RE-**turns with a PRISONER.

**U. S. Deputy Marshal Sam Bendit,** who has been missing for several days in the vicinity of Tangier Sound, and over whose absence some uneasiness was felt, turned up all safe and sound in Norfolk yesterday, with his man, Charles C. Connetton, of Onancock, in custody, and held him before U. S. Commissioner R. L. Crockett, who held him in \$200, with H. S. Crockett, of Onancock, as surety, for appearance at the November term of court.

**The case has its humor. Connetton** owns the schooner Anna, a Chesapeake fisherman. Lawrence Locke was one of her crew, and on discharge, sent Connetton on a claim for some \$21, due as wages. A man by the name of Evans was put in charge of the boat after it was seized by U. S. Deputy Marshal West. By some means the Anna's yawl escaped the libel and Evans deserted her at the wharf and hid himself in a small boat on the river. Connetton arrived in Tangier Sound, and on his persisting in his action, thrashed him, whereupon Evans complained. A bench warrant was issued for Connetton. Deputy Marshal Bendit went to serve it, and Connetton was out fishing, whereupon Bendit had a fair fight and succeeded in getting lost in Tangier Sound, spending a night and part of a day in the fog, rain and general discomfort before he found his way to bearings he was acquainted with. He caught Connetton when that gentleman came ashore, and the result is known to date.

**Meanwhile, in one of the last violent** storms, the schooner Anna was blown ashore, and now lies full of water, high on the flats and partly wrecked. It is likely she will be sold by Deputy Marshal Bendit some time next week, and the whole matter, except the assault case, will be closed.

**Excursion Tickets.**

**On July 1st, 2d, 3d and 4th to 10 a. m.** July 4th, the Norfolk and Western Railroad Company will sell excursion tickets at reduced rates. These tickets will be good for return passage till July 7th.

## ANOTHER BIG PLANT

**The Finest Cold Storage Plant** South of Philadelphia in Norfolk

**Ready For Business—Will Be a Material Factor in Increasing Norfolk's Importance as a Distribution Point of Fruits, Dairy Products and Eggs.**

**Probably few, even of our best in-**formed citizens, are aware that one of the finest cold storage plants in America, and one pronounced by experts to be the finest in the South, has just been completed in this city, but such is the case.

**This handsome plant was erected** by Mr. R. B. Fentress at a cost of about fifty thousand dollars, and stands facing Foster's lane, opposite the Clyde line offices, between East Main street and Water street, being about 150 feet from Water street. It is surrounded on all sides by an open space of about 31 feet, except on the west, and here also there is ample open space. Fifty trucks can at one time back up to the building and load or unload.

**THE BUILDING.**

**Briefly described the building is** of brick, five stories high, with a front of 100 feet and a depth of nearly 80 feet. Connected at the rear, but separated from the main building by a solid fire wall, is the boiler and machine room, 25 by 40 feet, and about 25 feet high.

**This is equipped with an Ames boiler,** from Chicago, N. Y., of 20 horse power, two ammonia pumps, polar refrigerating and ice-making machines, made by the Isbell-Porter Company, of New York and Newark, N. J., and all necessary smaller machinery, tools, etc. The refrigerating and ice-making system, consisting of a gas engine, analyzer, heater, rectifier, cooler, absorber and condenser, all in duplicate and all of the latest design.

**The machines work so perfectly and** easily that they are almost noiseless. The floor of the boiler and machine room is of solid concrete, 12 inches thick.

**CHLORIDE BRINE USED.**

**The brine used to cool the building** is not ordinary brine, but one made from chloride of calcium. This is used in preference to ordinary salt brine, as it stands a much lower temperature before freezing. This brine can be run at a temperature of 25 degrees below zero, while ordinary salt brine will only run at about 9 or 10 degrees below without freezing.

**By this system any room in the build-**ing can be brought below the freezing point, while many can be brought down to zero and less. The butter freezers are kept at about 5 degrees above zero. Any temperature desired can be obtained according to the character of the goods in storage in the various rooms. The temperatures maintained for the various stored products are gauged according to the best scientific knowledge of the day.

**DESCRIPTION BY FLOORS.**

**The office of the plant is on the first** floor, at the northeast corner of the building. This room is 12x15 feet, fitted with all modern office requirements and heated by steam. Just west of the office is the main entrance to the plant, opening into a large auto-chamber, and a set of Fairbanks' scales, which weigh the door of a capacity of 4,000 pounds. Here also is the elevator. Back of the office is the fish room, capable of holding many car-loads of barrel fish. Already several car-loads are stored here.

**West of the fish room is the meat** room, capacity six to eight cars, next the butter freezer room, then the butchers' meat room.

**THE BUTCHERS' MEAT ROOM.**

**This latter room is of such impor-**tance to Norfolk's meat handlers as to require special mention. It is divided into five separate compartments, with a hallway in the center. At the south end of the room is one large compartment and the fourteen smaller compartments range seven on either side of the hallway. Along the hall way is an overhead railway for the hanging of hams or any part of the room. The room has electric lights and a complete air circulation. It is approached by a separate line on the west of the building, for the exclusive use of the patrons of the room. It gives the butchers of Norfolk opportunity for first-class storage of meats at a nominal cost, and nearly all of the small rooms are already rented.

**THE SECOND FLOOR.**

**The second floor is entirely devoted** to butter freezers, and is laid off into four rooms. Here an absolutely uniform temperature is maintained. The capacity of each room is about 100 car-loads of butter. In one freezer there are now stored about twelve car-loads.

**THE OTHER THREE FLOORS.**

**The third floor is divided into four** rooms for storage of eggs, and will keep the hens of Virginia and the Carolinas working full time and perhaps extra hard to keep this immense
